Information Systems graduate with experience in data analysis, user research, and cross-functional collaboration. Skilled in understanding business needs, analyzing system workflows, and supporting requirement documentation throughout the SDLC. Experienced in translating user needs into structured solutions through research, documentation, and system evaluation. Detail-oriented, analytical, and eager to grow as a System Analyst contributing to reliable and user-centered digital products.

WORK EXPERIENCES

CV Boga Kaya Rasa

Visual Communication Designer – Marketing Department

September 2024 – Present

- Designed and Analyzed marketing workflows across five brand social media accounts **accounts** (Barong Palembang, Barong Hotel, Baropi Grill, Shabupot, and Barong Steak) to ensure consistent communication and delivery processes.
- Identified gaps, inconsistencies, and improvement opportunities in digital content workflows.
- Documented revision processes and coordinated with cross-functional teams to ensure deliverables met agreed requirements and timelines.

Bebaju.co

Social Media Manager (Instagram, TikTok, Facebook)

March 2022 – September 2023

- Analyzed user feedback and engagement metrics to identify improvement opportunities in digital campaigns.
- Planned and organized content workflows across multiple platforms.
- Collaborated with team members to plan campaigns and improve customer experience.
- Documented insights and performance results to support decision-making.

PT Pupuk Sriwidjaja (PUSRI) – Palembang, Indonesia

Data Analyst Intern – IT Department

September 2020 – February 2021

- Analyzed business needs related to raw material price fluctuations and translated them into data-driven forecasting solutions.
- Developed automated web scraping to support data collection and validation processes.
- Built a forecasting model to predict raw material prices for upcoming months, supporting planning and decision-making.
- Performed data validation and SQL querying to ensure data accuracy and reliability.
- Documented processes, analysis results, and recommendations in structured technical reports.
- Collaborated with IT and data teams to review system outputs and provide insights for stakeholders.

PT Telkom Indonesia – Palembang, Indonesia

Student Intern

November – December 2019

- Assisted in analyzing internal operational applications and data flows.
- Reviewed system workflows to identify potential issues and inconsistencies.
- Supported documentation and reporting for internal stakeholders.
- Gained exposure to enterprise system evaluation processes.

EDUCATION

Universitas Sriwijaya - Palembang, Indonesia

July 2017 - October 2021

Bachelor's Degree in Computer Science (GPA 3.42/4.00)

COURSES & TRAININGS

Quality Assurance Bootcamp – Sanbercode

November – December 2025

- Learned Software Development Life Cycle (SDLC) and collaboration between developers, QA, and analysts.
- Practiced test planning, requirement interpretation, and structured documentation.
- Completed final project recognized as Best Project of the batch.

Software Quality Assurance – MySkill

December 2025

- Practiced understanding system requirements and translating them into structured testing and documentation processes.
- Learned collaboration workflows using Git and Jira.

Bootcamp UI/UX Design – MySkill

August - October 2022

- Learned design thinking, user research, user flow, wireframing, and prototyping.
- Applied user-centered approach to understand user needs and improve system usability.

PROJECTS

System Analyst Virtual Internship Project – KlinikGo

March – April 2026

- Analyzed healthcare business processes and translated them into system requirements using the Software Development Life Cycle (SDLC) approach
- Gathered and documented functional and non-functional requirements to support system development
- Designed system models and documentation including flowcharts, Data Flow Diagrams (DFD), use case diagrams, sequence diagrams, and activity diagrams
- Translated business needs into clear system specifications and workflow designs
- Utilized SQL for data querying, validation, and supporting system analysis
- Identified problems and proposed data-driven solutions aligned with user needs and business objectives
- Applied analytical thinking and problem-solving skills in developing efficient and user-centered system solutions

UI/UX Virtual Internship Project – Nuri

September – October 2023

- Conducted user research to identify user pain points and define problem statements.
- Developed user flows, wireframes, and prototypes based on user and business requirements.
- Translated user needs into structured digital solutions and documentation.

Website Revamp Project – Myskill.id (Mobile Version)

August - October 2022

- Conducted research to analyze user pain points and feature requirements.
- Improved navigation structure and usability through wireframing and prototyping.
- Focused on improving user journey and overall system usability.

SKILLS

Hard Skills:

- System & Workflow Analysis
- Requirement Analysis & Documentation
- User Story & Acceptance Criteria (basic)
- SDLC & Agile Understanding
- Business Process Understanding
- User Flow & System Workflow Design
- ERD & Database Understanding
- BPMN / Flowchart (Draw.io, FigJam)

Tools: Jira, Git, MySQL, Figma, Postman, Cypress, Selenium, Katalon Studio, Draw.io

Soft Skills: Analytical Thinking, Problem Solving, Communication, Stakeholder Collaboration, Attention to Detail, Adaptability

Languages: Indonesian (Native), English (TOEFL ITP 550)
